

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Chauvin *et al.*
Serial No. : To Be Assigned, a continuation of USSN 08/505,131
Examiner : To Be Assigned
Filed : November 24, 2003
Group Art Unit : To Be Assigned
For : RUBBER COMPOSITION WHICH IS FREE OF CARCINOGENIC NITROSAMINE PRECURSOR AND SERVES AS CONNECTING RUBBER

Mail Stop Patent Application
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

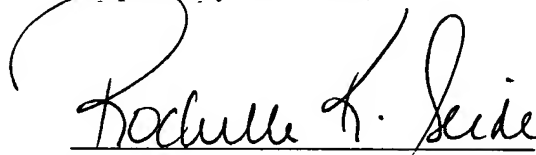

The present paper accompanies the filing of an application filed herewith as a continuation of United States Patent Application Serial No. 08/505,131, filed on July 21, 1995. Pursuant to 37 C.F.R. § 1.98, Applicants submit the attached PTO 1449, which lists references cited in the parent application, U.S. Appln. Serial No. 08/505,131. Applicants request that the cited references be made of record in the above-referenced application.

Pursuant to 37 C.F.R. § 1.98(d), copies of the cited references have been provided in the parent application and are not being supplied herewith.

Identification of the listed documents is not to be construed as an admission of the applicants or attorneys for applicants that such citations are available as "prior art" against the subject application. If the Examiner applies the documents as prior art against any claim in the application and applicants determine that the cited documents do not constitute "prior art" under United States law, applicants reserve the right to present to the Office the relevant facts and law regarding the appropriate status of the documents.

Applicants further reserve the right to take appropriate action to establish the patentability of the disclosed invention over the listed documents, should the documents be applied against the claims of the present application.

Respectfully submitted,

A handwritten signature in black ink, reading "Rochelle K. Seide". The signature is fluid and cursive, with a large loop at the beginning and a long, sweeping tail.

Richard G. Berkley
Patent Office Reg. No. 25,465

Rochelle K. Seide
Patent Office Reg. No. 32,300
